Karina Macancela

Summary

I am a Software Developer and a contemporary artist living in NYC. As a programmer, I focus on creating and managing programs for clients. I have worked with frameworks such as Spring and Hibernate and with languages such as Java, JavaScript, HTML, CSS, and SQL. I have always been a curious individual, interested in various subjects with a desire to positively contribute to the community. Besides coding, I am a passionate painter and aspiring cartoonist. I believe that learning how to create my ideas helped me realize that I want to produce something that could help others.

Experience

Senior Associate
04/2017 - present

Infosys Limited - U.S.A.
- I have been working closely with clients on-site as a software consultant.
- I worked with well-known health insurance company, Aetna, for two years as a software developer and project manager. This allowed me to get experience in developing and managing projects from start to finish.
- I was trained extensively in both roles. Meanwhile, I continuously communicate and organize with our offshore team.

Project Manager
02/2018 - 05/2019

Aetna - Hartford, CT
- Coordinated with project managers and stakeholders to track project scope, schedule, and cost.
- Assisted Project Managers in preparing the project financials such as labor and non-labor budget reports, major milestones, and forecasting reports.
- Performed activities such as creating audit records, validating approvals, and conducting compliance audits.
- Extensive use of project management tools such as IBM Rational ClearQuest and ClearCase, Intuit QuickBase, PlanView, and SAP BI Launchpad.

Software Developer
06/2017 - 02/2018

Aetna - Hartford, CT
- Developed, tested, and supported various APIs for different consumers based on their requirements using IBM API Connect.
- Utilized Splunk to check logs for errors in order to debug API failures.
- Worked closely with the DevOps team to create an automated and faster way to deploy APIs.
- Coordinated with offshore talent to gather requirements from consumers for API development.
- Utilized Git to upload completed APIs to the companies private repository so the DevOps team could automate its deployment into testing environments.

11/2016 - 04/2017

Full Stack Developer

Revature - Flushing, NY

- Used HTTP Servlet to handle GET and POST requests.
- Created a Business Delegate to build a bridge between business logic and backend.
- Incorporated POJO Java beans to work with a SQL relational database.
- Used JDBC to allow clients to access the database.
- Used ORM framework in order to map beans to tables in our relational database in SQL Developer.
- Implemented Continuous Integration with project collaborators using Slack and Git.

09/2013 - 11/2016

IT College Assistant

City University of New York - Flushing, NY

- Employee of the Office of Information Technology at Queens College while being a full-time student.
- Supervision and maintenance of the open lab and surrounding classrooms.
- Help desk duties such as assistance with projectors, laptops, smart boards, and re-imaging computers.

Education

08/2011 - 06/2016

Queens College

City University of New York - Flushing, NY

- Bachelor's in Computer Science with 3.1 GPA
- Bachelor's in Applied Mathematics with 3.4 GPA
